

**QS&T**

**STAMPED PARTS**

# ***Finished to Your Specs***

***Clockwise from top: motor bracket, washing machine clutch, solenoid, heat gun nozzle, filter can (2 parts).***

Our many secondary operations enable us to detail-finish your part to your exact requirements. Typical operations include, but are not limited to:

- Blanking
- Piercing
- Forming
- Staking
- Drawing
- Welding
- Shaping
- Brazing
- Threading
- Painting
- Plating
- Fabricating

If your part calls for alterations beyond the ability of the functions listed above, please let us know. Chances are we can handle that, too.

# ***Stamped Parts...***

*Clockwise from top left: clutch plates, water pump plate, solenoid contactor, solenoid mounting bracket.*

Why do we believe QS&T is an excellent source for stampings? Our in-house die making capabilities and state-of-the-art, high speed, automatic stamping equipment enable us to deliver parts like the ones in this brochure, plus countless others...

- In sizes from grams to tons
- Up to 1/4 inch thick
- In quantities from hundreds to millions
- With guaranteed, precise, repetitive accuracy

## ***Need More than Stampings?***

In addition to stampings, QS&T also manufactures...

**Extruded Products** — aluminum parts up to 6" in diameter.

**Heat Transfer Products** — including OEM radiators, charge-air coolers, and oil coolers for the mobile and stationary equipment markets.

**Metal Fabricating** — forming and welding.

Please call, fax, write or visit our website for further information.
